Products

Stonerex

Stonerex panels are autoclaved boards, doubly compressed, manufactured according to EN 12467: 2012 + A2: 2018 standard. They are characterized by an excellent mechanical property: in fact they are classified in the highest class of mechanical resistance (Class 5), keeping their peculiar features in terms of fire behavior (class A2 s1 d0 in compliance with EN 13501-1).

Stonerex FP

Stonerex FP panels are autoclaved, doubly compressed boards, manufactured according to EN 12467: 2012 + A2: 2018. They are characterized by excellent fire behavior: in fact they are classified in the top class of flame resistance (class A1 in compliance with EN 13501-1), maintaining excellent mechanical properties (Class 4)

Stonerex Safe

Stonerex Safe panels are autoclaved, doubly compressed boards, reinforced with a fiberglass mesh glued on the backside; they are manufactured according to EN 12467: 2012 + A2: 2018. This product has been designed to meet total safety requirements in multiple applications.

FIBRESTONE
FACADE BOARDS

Hydro/HydroPlus Standard

The through colored surface has an extremely material appearance that is enhanced over the years.

- Thirteen different through coloured shades and a smoothed surface give Stonerex Hydro and Hydroplus finishing boards an extremely natural appearance, which is their main feature.
- Non uniform colours and some small imperfections of the surface are a feature of the product.
- Colours, even through reproduced with great care, can vary compared to the original ones. For colour choice, one must decide from samples supplied by the company, keeping in mind that some difference in tone is possible between different batches and that every board is unique.

FIBRESTONE
FACADE BOARDS

Hydro/Hydroplus Groove

Deep lines run along the length of the board and give the fibercement a natural soul, giving it a wooden effect. Groove finishing, as well as giving value to the surface, looks pleasant and modern.

- Available in 13 through coloured tonalities with hydro and Hydroplus finishing.
- Non uniform colours and some small imperfections of the surface are a feature of the product.
- Colours, even though reproduced with great care, can vary compared to the original ones. For colour choice, one must decide from samples supplied by the company, keeping in mind that some difference in tone is possible between different batches and that every board is unique.
- Groove lines run along the length of the panel only

Hydro/Hydroplus Rigo

Regular millings run parallel on the surface, creating unique lights effects.

- Available in 13 through coloured tonalities with Hydro and Hydroplus finishing.
- Non uniform colours and some small imperfections of the surface are a feature of the product.
- An installation that allows water to flow along the facade is recommended
- Colours, even though reproduced with great care, can vary compared to the original ones. For colour choice, one must decide from samples supplied by the company, keeping in mind that some difference in tone is possible between different batches and that every board is unique.

Hydro/Hydroplus Sandblasted

The particular process technique on the surface gives an irregular and worn out effect, and, at the same time, a refined look that highlights the soft through coloured tones of the product.

- Available in 11 through coloured tonalities with hydro and Hydroplus finishing.
- Non uniform colours and some small imperfections of the surface are a feature of the product.
- Colours, even though reproduced with great care, can vary compared to the original ones. For colour choice, one must decide from samples supplied by the company, keeping in mind that some difference in tone is possible between different batches and that every board is unique.

Hydro/Hydroplus Stripes

The surface characterised by continuous lines is interrupted by regular cavities. The Board looks like an assembly of wooden boards, and recalls a slat effect, typical of dry constructions.

- Available in 13 through coloured tonalities with Smoothed or Groove surface and Hydro or Hydroplus finishing
- Non uniform colours and some small imperfections of the surface are a feature of the product.
- Colours, even though reproduced with great care, can vary compared to the original ones. For colour choice, one must decide from samples supplied by the company, keeping in mind that some difference in tone is possible between different batches and that every board is unique.

FIBRESTONE
FACADE BOARDS

Hydro/Hydroplus Surface

The interesting work done on the surface gives the board a particular rustic and irregular look. Having a great aesthetic impact, the surface gives off a natural colour effect which is of great value.

- Non uniform colours and some small imperfections of the surface are a feature of the product.
- Stonerex Surface is available in three through colours with Hydro and Hydroplus finishing.
- Colours, even though reproduced with great care, can vary compared to the original ones. For colour choice, one must decide from samples supplied by the company, keeping in mind that some difference in tone is possible between different batches and that every board is unique.

Through Coloured Range

Finishing Crystal

The natural nuances of the board are intensified by an acrylic transparent finishing that gives brilliance and intensity to the base colouring. Thanks to the elaborate process of application of paint on both surfaces and to the protection on the sides, the board obtains specific features resistant to graffiti, salt fog and to sulfur dioxide.

This kind of treatment encourages the application of these boards in urban zones with high smog density and near the sea. For cuttings done on building sites, we advice that the cut edges should be treated before being set. Acrylic transparent anti graffiti treatment is available only for Stonerex with standard finishing.

- The product is available in 13 through colours.
- Non uniform colours and some small imperfections of the surface are a feature of the product.

- Colours, even though reproduced with great care, can vary compared to the original ones. For colour choice, one must decide from samples supplied by the company, keeping in mind that some difference in tone is possible between different batches and that every board is unique.

Spectra Finishing

Pigmenta Finishing

On a through colour base or on a natural base, a full colour applied on the surface can satisfy any aesthetic taste. For Cuttings done on building sites, it's recommended to seal the cut edges with the special product before setting the boards.

- Stonerex Pigmenta is available in all NCS colours range.
- It's possible to recreate whatever colour required choosing from the NCS range (300 m2 minimum quantity required for each colour).
- The colour of the base panel is at SIL's discretion.

Pigmenta Glossy

Stonerex Pigmenta is also available in the Glossy version (gloss 27% max). Pigmenta Glossy is available in all NCS colours range.

- It's possible to recreate whatever colour required choosing from the NCS range (300 m2 for colour is the minimum quantity required).
- The colour of the base panel is at manufacturer discretion.

Spectra Finishing

- Stonerex Spectra offers an extraordinary range of colors to create unique facades and interior designs. Stonerex Spectra Boards are available only with standard finishing. The through coloured or natural base, the full color applied on the surface, the colored beveled edges, are the salient features of this performing product, that is able to meet any kind of need. For cuttings done on building sites, just for aesthetic reason, it's advisable to seal the cut edges with the same colour of the surface before setting the boards.

- Colours, even though reproduced with great care, can vary compared to the original ones. For colour choice, one must decide from samples supplied by the company.

- It's possible to recreate whatever colour required choosing from the NCS range (300 m2 for colour is the minimum quantity required).

- The colour of the base panel is at SIL's discretion.

Wood design

Fancy Wood is now available in 9 different designs. The new range consists of wood finishes that meet the most demanding architectural requirements.

The available wood finishes are characterised by both light and dark shades, and by continuous and lively patterns. Fancy Wood brings the warmth and elegance of wood to a fibre-cement panel utilised in an interior and exterior applications.

The exceptionally realistic visual effect and its limited environmental impact make it an interesting product.
